- GRC RAW MATERIALS

GRP LINING

GRP Lining for Underground Concrete water tanks / Chemical Storage Tanks / Steel Tanks prevents leakage and absorption of water and protects water from algae and fungal growth. GRP Lining is permanent layer coating process, and will last for a lifetime. GRP lined tanks are suitable for storage of potable water as we are using the same water Tank manufacturing materials for Lining.

Specifications:

- ✓ Base Material – General Purpose Resin / ISO Resin
Chopped Standard Mat – 450 GSM & 300 GSM
Catalyst / MEKP
